STOP STATIC on Your Folder - IONIX FDS

Now you can fold those static filled laser imaged documents with no trouble! The IONIX FDS (Folder Delivery System) replaces your folders roller guard cover with one that stops static dead in its tracks, and eliminates the production bottleneck it usually causes. An air splitter is installed in the blower line following a special IONIX air treatment cartridge. Treated air is directed to the FDS roller guard cover air manifold, and the feeder. All static electricity is eliminated from the folding roller and the feeder. The FDS also prevents static build-up on the folder plates. It's a system you cannot afford be without, especially if you're running laser imaged stock.

1 A simple 10-minute installation using just a pair of scissors and an allen wrench.

2 Available as standard for Baum 714 and Martin Yale 959AF folders. Call us regarding other model retrofits.

3 The simplest and most economical add-on to your folding machine that can pay for itself in just one job!

Ask me about our Special 'STOP STATIC' Introductory Price... Includes **FREE Shipping!**

Here is what your FDS System will include...

- One IONIX Static Eliminator replaceable air treatment cartridge
- One Roller Guard Cover air manifold to replace OEM roller cover
- One Air Splitter T-Assembly for termination with blower lines
- One full length of installation tubing
- Complete installation instructions

Confirm inside diameter of blower line before ordering. Baum 714 folders should be 5/8" or 7/8" ID. Martin Yale 959A folders should be 1/2" ID.
