

COMPUTER-TO-PLATE UNDER \$2000

If you have a computer this economical robust PACKAGE INCLUDES EVERYTHING else you need to get your jobs to the press, and out, FAST...

*Limited Availability • Call 800-341-6650 Today!

HERE IS WHAT YOU GET:

❖ HP5100 PLATE IMAGING PRINTER

This is the last Hewlett Packard printer model made that could be modified to produce high quality laser plates. We refurbish these units with new component parts, and set them up for plate production. There are only so many of these sought after machines remaining, hence the limited availability. It's turbo-charged with 192MB of memory; an IMPORTANT FEATURE that lets you output a 12" x 18" halftone or screen easily, and will get you through most any page image fast and trouble-free. Our Imaging Printer carries a 90-Day Warranty.

**192MB
Memory!**

❖ BRAND NEW OEM TONER CARTRIDGE

Many laser plate users try to cut corners by using refurbished toner cartridges. Bad idea, since it is virtually impossible to seal them like a new one. Any toner leakage, however slight, will cause unwanted 'toning' on press. NEW TONER is an important part of laser plate performance.

❖ FREE STARTER PACKAGE OF 100 LASER II PREMIUM PLATES

These superior plates have an improved coating that allows the toner to firmly adhere at lower temperatures. They can hold a wider range of halftone dots, and will run up to 10,000 impressions under proper press conditions. Used properly, the LASER II plates approach the ease and quality of metal CtP plates.

FREE!

❖ PACKAGE OF 100 PLATE BACKING STRIPS

Polyester based laser plates do tend to stretch on the press. These special aluminum backing strips will eliminate plate stretch allowing you to run close register multi-color jobs.

❖ 1 GALLON OF ONE-STEP FOUNTAIN CONCENTRATE

A terrific all-around fountain solution that also happens to be the best for running Laser II plates. Use it on all size presses. Results in remarkably brighter and sharper colors with less dot gain. Non-toxic, mild odor, helps prevent calcium build-up. One gallon makes 32 gallons solution.

❖ 1 QUART LASER PLATE PREP/CLEANER

Best solution available for cleaning up laser plates on the press. Just wipe down to eliminate toning trouble. Will not affect image area. Easy to use and compatible with other chemicals.

❖ 1 LASER IMAGE DELETION PEN

For easy correction of mistakes and minor errors. Can be worth its weight in gold when it saves you the trouble of a plate make-over during a big rush order!
