Helping Printers Increase Their Profits Since 1970

Pressroom Air Cleaner, Purification Unit

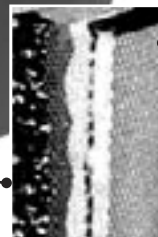

Although it will work in any part of your operation, this air purifier was created specifically for the pressroom. It is designed to clear the air of chemical fumes from press washes, smoke, and other odors usually prevalent in printing operations. The economical standard model shown below will service a room up to 1,000 square feet (based on 10 ft. ceilings), replacing all the fouled air with clean odor-free air every 10-15 minutes.

Small Footprint, Big Results...
Only 16.5" Diameter x 15" High

Behind the outside sleeve there is a cavity holding 340 cubic inches (6 lbs.) of Activated Coconut Shell Carbon. When foul air passes through this activated carbon, it acts like microscopic magnets that effectively attract and hold chemical fumes and odors. Changing the carbon granules is easy! You simply open the top of unit, pour out, and replace with new carbon granules. A special filling funnel is provided. A new charge will last 4 to 6 months.

The outside 'sleeve' pre-filter is washable. Made up of special reticulated polyurethane foam, this filter traps paper dust, press powder, and pollens. It filters particles as small as one micron in size.

- Works by ADSORPTION, using activated carbon to attract and contain chemical fumes and odors.
- Activated Carbon - Outperforms most all other means of purifying air.
- Washable pre-filter traps dust, press powder, pollens, and filters particles as small as one micron in size.
- Can be run on HI or LOW speed, 24 hours a day, with minimal energy use.
- Simple, compact, effective. One year manufacturers warranty.
- Low maintenance. Easy carbon change-out about twice a year.
- It's known as 'The One That Works' - You can prove this to yourself with our **NO-RISK 10-DAY TRIAL!**
